What is the secret to startup accounting?

Joshua Smee
Brilliant

1. Understand how/what processes run today

Really don't expect there to be processes, and definitely not optimized ones.

2. Tackle the quickest, biggest impact improvements

Most likely this is in the tech stack, adding automation.

3. Map out and plan for longer-term improvements

Requires business trust and collaboration, so don't rush into these.

What is something that surprises people, knowing you're an accountant?

Joshua Smee
Brilliant

I am a huge Astronomy nerd... always surprising the team with my Zoom galaxy backgrounds.
